

4 IN 1 MULTI-PURPOSE CLEANER & DISINFECTANT CONCENTRATE

Busy workspaces and public areas need the additional benefits of a long-lasting disinfectant cleaner which not only removes stains and neutralises odours, but kills the associated germs and works between cleans to help maintain public health and safety. Unlike traditional cleaners, Bytrol 4 in 1 Multi-Purpose Cleaner & Disinfectant Concentrate combines the power of four products in one; removing dirt and stains, neutralising odours, as well as general cleaning and fast disinfection. Formulated to kill 99.99% of bacteria and viruses, including Norovirus, Influenza A (H1N1, Swine Flu), Listeria and E.coli, this product continues to work even when dry, protecting even frequently touched surfaces between cleans.

SUITABLE FOR MOST HARD SURFACES INCLUDING KITCHENS AND CATERING AREAS, HARD FLOORS AND FLOORCOVERINGS, WALLS, FURNITURE AND FABRICS, OFFICES, WORKSPACES, BATHROOMS AND SANITARY WARE.

Added Benefits:

- Economical concentrate format allows for varied use.
- Multi-purpose product reduces supplier and portfolio complexity.
- Quick kill in 30 seconds even in high soil.
- Unique, patented formulation.
- Removes organic stains without bleach.
- Neutralises odours without masking.
- Leaves a clean, fresh fragrance.
- Compliant with Biocidal Products Register, CLP and Article 95.
- Stain Remover - YES
- Odour Remover - YES
- Cleaner - YES
- 24h Efficacy - YES
- Dilution - 1:5, 1:10, 1:40

(1:5 works to the same effect as their 1:1)

- BPR Proved* - YES

* The Biocidal regulations are changing and many products are not being supported through 'BPR' due to the cost and potential failure. Bytrol are supporting 4 in 1 through BPR

Exceptional Antimicrobial Efficacy:

- EN 1276 (bactericidal).
- EN 13697 (bactericidal, yeasticidal, fungicidal).
- EN 1650 (yeasticidal).
- EN 14476 Norovirus, Rotavirus, Influenza A (H1N1, Swine Flu), Coronavirus, Vaccinia virus.
- BSI PAS 2424 to demonstrate 24 hour residual efficacy.

Directions:

- Suitable for use in trigger sprays, mop buckets and most cleaning appliances (**not suitable for Fogging**).
- Remove surface soiling where possible.
- Dilute to required concentrations.
- Direct spray away from face and eyes. Spray from 10cm-20cm away or apply evenly onto surface, ensuring all areas are treated.
- For food contact surfaces, please rinse off after use.
- Allow surfaces to dry.
- If in doubt, pre-test on an inconspicuous area.

Dilutions:

- Heavy Soiling - Antiviral & Antibacterial Disinfectant Cleaner with 24hr protection - 1:5 Dilution
- Medium Soiling - Antibacterial Disinfectant Cleaner - 1:10 Dilution
- Low Soiling - General Cleaning - 1:20 and 1:40 Dilution.
